PRIMARY EXAMINER

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

**Examiner's Amendment**

Rewrite the abstract as follow:

**ABSTRACT**

A method and apparatus for the estimation of traffic matrices in a network are disclosed. Mechanisms are disclosed for measuring traffic volume from a plurality of ingress points to a plurality of egress points in a large scanl network, such as an IP backbone network. The traffic matrix is advantageously inferred from widely available link load measurements such as SNMP data.

Authorization for this examiner's amendment was given in a telephone interview with Samuel H. Dworetsky on June 21 2007.

The following is an examiner's statement of reasons for allowance: The claims are allowable over the references of record in that none of the references of record teaches constructing a gravity model Of link to link traffic utilizing the link load measurements to capture an overall distribution of the volume of traffic between the ingress points and the egress points; and finding a traffic matrix that minimizes a distance metric subject to tomographic constraints to an initial tomographic solution based on the gravity model,.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
